# Centurion Sterilization Services

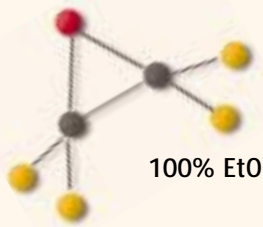

Medical Device Sterilization Since 1975

- ISO13488 certified
- EN550 compliant
- FDA registered
- Three facilities to handle logistics for every region of the country
- 100% Ethylene Oxide sterilization
- Capable of handling all product volumes – from single cases to truck loads
- State-of-the-art facilities, equipment and techniques; fully trained and experienced staff
- Turnkey sterilization validation program
- Customized EtO cycles, featuring three- and seven-day release
- On-site, full service laboratory allows samples to be tested immediately – eliminating extra expenses or transportation delays
- Full regulatory support, including protocol preparation, full documentation and final report package
- Parametric release available
- Offering on-site contract laboratory and packaging services
- Medical devices only; no powders, talc or seeds
- One source for your packaging, cycle development, sterilization, laboratory testing, warehousing and shipping

Centurion Sterilization Services has offered uncompromised service and quality since 1975. Our goal is to guide our customers through every step of the sterilization process to ensure hassle-free, prompt, accurate results. We will work closely with you to provide customized protocols, regulatory support, testing and full documentation.

Our highly experienced staff includes teams from the laboratory, research and development, and quality control. We are always available to assist you, from the planning stages to your completed validation.

Whatever your needs, Centurion will guide you through – every step of the way.
